Revision of Country Questionnaire, Albania

REF : St/I Office Notice No. 56, 28 June 1956

1. It is requested that Section 30, Telecommunications, Albanian Country Questionnaire be retained with the following changes:

- a. Change paragraph 30 (a), Line Communications, to read as follows:

"... Most exchanges are small and manually operated, Tirane alone has an automatic telephone system. The first Five-Year Plan provided for the addition of 1,500 new lines linking the larger towns. Some of this expanded circuit capacity appears to have been provided by underground cable. Of the eight pre-war submarine cables ...."

- b. Add the following question under Line Communications:

If underground cable has been used to provide increased interurban circuit capacity, what is the route followed and the capacity of the cable?
